RMP DEC 26			

Paris, December 5th, 1924.

Prof.
Magnus, UTRECHT
and Doctor Gregg.

General discussion of the plan for pharmacology.
Agreement on arrangements
~~Reading of the final decision~~, on the assumption
that the University can contribute a total of
125,000 florins towards a total of 580,000 florins
(See letter of December 6th and minute for the
docket forwarded to W.S.C.)

(Note for ~~GGW~~ ^{Wells})

R. de Silva Margarido - Arrangements will be made for
him to work with Professor Loewi at Graz.

Magnus of Utecht suggests Professor W. Straub of Munich,
Professor W. Heubner of Göttingen and Professor Paul
Treuⁿdelenburg of Freiburg as the three best men in
pharmacology with whom our men might work.

(Copy sent Wells - GB)

Doctor Gregg

Prolonged discussions of plans, policies etc. Gregg
will probably be busy in Italy until March 1st and then
plans to visit Spain and Portugal; I will probably go
down in February when his work in Italy is approaching
an end. He has secured a very good secretary, only for
the three months' period and not as a permanent man.

I think Gregg is a little out of touch with the
New York Office; I will send him, while I am in Europe,
the diaries of WSC and FWO'C and, when I return, I
think a copy of these as well as my diary might be sent
him direct.

Page 23.

Paris. Dec. 6th.

Afternoon spent in Professor Brumpt's Laboratory of
Parasitology (See Notes)

Doctor Hackett here for conference with Gunn - He had
dinner with me and seemed very delighted about his
Italian work.

Doctor Gregg General Discussion.

RMP INTERVIEWS:
PARIS

Sunday, December 7, 1924

The past week has been divided roughly between Lyons and Gregg - the former as depressing as the latter is stimulating.

Lyons, on the side of nursing and child welfare is progressing; but otherwise the medical problem is discouraging. Like Brussels and Leiden it has a white elephant on its hands in the shape of an incomplete old-fashioned type of sprawling pavilion hospital. By the time that is completed and equipped it will have no money for medical education. Lepine is progressive (from French point of view, not from ours) earnest, capable, and businesslike, but defends the real faults of the French system. However, I may get more light after my next visit and with the experience of visits to other schools in the meantime.

(Copy sent to HvW)

Gregg has gained an insight into problems of Central and Eastern Europe through his tour with HOE, covering every country of emergency program except Turkey. He has made a start on Italy, recently has secured a secretary who is also interpreter, and hopes to have Italy completed by March 1. We have talked over all sorts of programs, problems and plans. He returns to Rome on the 9th and I will join him in February. His French is pretty fair, but Italian as yet inadequate - his interpreter will help him to get it. Alan Jr. weighs 22 lbs., "finest baby" etc. Family comfortably located at Capri. AG in fine form.

Gunn is back from Jugoslavia and reports that Stampar appears to have weathered the storm.
